SUMMARY

Recent Software Engineering graduate with strong professional and freelance full-stack development skills and hands-on experience in web and mobile applications. Proficient in technologies like Next.js (React.js), Expo (React Native), TypeScript, SCSS, Tailwind CSS, SQL Supabase, and Firebase. Passionate about writing clean, maintainable code, solving real-world problems, and growing in agile, fast-paced environments.

SKILLS

Frontend: Next.js (React.js), Expo (React Native), HTML, CSS, SCSS, Tailwind CSS, Bootstrap CSS.

Backend: Supabase (PostgreSQL, Authentication, Storage), Firebase (NoSQL, Authentication, Storage, Hosting), XAMPP (MariaDB, MySQL), RESTful API, Microsoft SQL Server (TransactSQL), Django.

Languages: TypeScript, JavaScript, SQL, Python (NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn), Java, C#, PHP.

Tools & platforms: Figma, Webflow, Vercel, Jira, Zephyr, Draw.io, Tableau, Microsoft Power BI, GitHub (Git).

EXPERIENCE

Web Developer at [Rayfitout](#) | Full-time, On-site | Dubai, AE

Jun 2025–Aug 2025

An award-winning interior design and fit-out firm specializing in high-end residential, commercial, and bespoke joinery projects across the Middle East, Europe, and Africa.

- Implemented best search engine optimization (SEO) practices, achieving #1 Google ranking for high-value terms and increasing inbound traffic.
- Implemented a pixel-perfect website from Figma balancing design, animation, and usability, earning positive client and visitor feedback.
- Fixed functional and visual bugs across screen breakpoints, boosting core web vitals by 40% and ensuring cross-device performance.
- Developed scalable layouts, reusable and complex components with animations, reducing development time for new web pages.
- Delivered a content management system (CMS)-powered website, streamlining blog and content updates without developer dependency.
- **Technologies used:** Webflow, HTML, CSS, JavaScript, GSAP, Figma.

Full-Stack Web Developer at Let There Be Fragrance | Freelance, Remote | Dubai, AE

May 2025–Jun 2025

A niche perfume house dedicated to crafting signature scents that embody elegance, individuality, and artistic expression.

- Collaborated with the brand's stakeholder to design and launch an e-commerce website.
- Integrated smooth real-time payments, enabling the brand to process online orders.
- Built an admin panel that enabled employees to manage inventory and product data.
- Ensured performance optimization, accessibility, and responsiveness across all browsers and devices.
- Enhanced user engagement with animations and a smooth user interface.
- Delivered web presence that expanded the brand's digital reach and supported its initial e-commerce launch.
- **Technologies used:** Next.js (React.js), TypeScript, Framer Motion, Tailwind CSS, Supabase (PostgreSQL, Authentication), Stripe, Vercel, Git, Figma.

Full-Stack Web Developer at Whealthy Vessel | Freelance, Remote | Jeddah, SA

Feb 2025–Mar 2025

A forward-thinking cookware company focused on improving wellness through innovating, non-toxic kitchen products.

- Partnered with company leadership to translate their product vision into a responsive and cross-platform website.
- Conducted regular testing and debugging to ensure cross-browser and cross-platform compatibility.
- Deployed the company's first web presence which enabled higher client outreach.
- **Technologies used:** React.js, TypeScript, SCSS, Git.

PROJECTS

[Examiq](#) | Solo Project

Mar 2025–May 2025

An artificial intelligence-integrated proctoring platform that monitors student behavior during online exams using gaze and input tracking to detect potential cheating, while also automating exam evaluation.

- Developed real-time gaze tracking, and automated grading using WebGazer.js and DeepSeek V3.
- Integrated input and behavior tracking using the browser's built in control API.
- Built comprehensive dashboards for teachers and admin to manage exams and review results.
- Deployed publicly to support accessible online proctoring using artificial intelligence at scale.
- **Technologies used:** Next.js (React.js), TypeScript, SCSS, Supabase (PostgreSQL, Authentication), RESTful API, WebGazer.js, DeepSeek V3, Vercel, Git.

FeelTok | Collaborative Project

Dec 2024–Dec 2024

An emotion-based social media platform where users post updates reflecting their current emotions (happy, sad, love, angry) through text or images.

- Designed and implemented responsive web and mobile user interface with dynamic styling based on emotion type.
- Developed user profile management and secure email and password reset with email-based two-factor authentication (2FA).
- Implemented role-based access control (RBAC) to differentiate admin (web dashboard: moderating users and posts) and user (mobile interface: creating post updates).
- Developed a reporting system where users can report inappropriate users and posts to ensure platform safety.
- Utilized agile methodology platform, Jira and Zephyr, for sprint planning, task tracking, incorporate feedback, managing test cases, and ensure timely delivery.
- **Technologies used:** Next.js (React.js), Expo (React Native), TypeScript, SCSS, Firebase (NoSQL, Authentication, Hosting), RESTful API, Cloudinary, Email.js, Git, Jira, Zephyr, Figma.

[Apollo](#) | Collaborative Project

Dec 2023–Dec 2023

A web-based hospital management system for managing patient appointments, medical records, billing, and diagnostics.

- Built dynamic database for doctors and staff for efficient patient moderation and record-keeping.
- Enabled patients to download medical test result for transparency.
- Integrated role-based access control (RBAC) to differentiate receptionist, doctor, and staff user experience.
- Deployed publicly to support any hospital access.
- **Technologies used:** Django, Python, Bootstrap CSS, XAMPP (MariaDB), PythonAnywhere, Git.

[Portfolio](#) | Solo Project

Aug 2024–Present

A personal portfolio website showcasing projects, technologies, and live demos to highlight software engineering capabilities.

- Designed and developed responsive user interface across all devices.
- Built with simple transition animations on mobile devices.
- Structured content to clearly communicate project details, technical depth, as well as the tasks that was completed.
- Deployed publicly for accessibility and fast loading.
- **Technologies used:** React.js, TypeScript, SCSS, GSAP, Firebase (Hosting), Git.

EDUCATION

University of Greater Manchester | BEng (Hons) Software Engineering | Ras al Khaimah, AE

Sept 2022–Sept 2025

- **Relevant coursework:** undergraduate project, agile programming, software engineering, data structures & algorithms, machine learning, advanced programming, and software development.
- **Achievements:** delivered several full-stack applications during academic tenure, achieved grade distinction.

Western International College | BTEC Level 3 Extended Diploma in Engineering | Ras al Khaimah, AE

Sept 2021–Sept 2022

- **Relevant coursework:** electronic devices & circuits, mechanical principles, thermodynamics, and calculus.
- **Achievements:** developed a clap-switch under Institute of Electrical and Electronics Engineers (IEEE) during academic tenure, achieved double grade distinction.
